# How to go quad without going broke.

It's easy to go quad inexpensively with some brands. Provided you don't mind sacrificing a little quality. Or you can sacrifice a lot of cash and get one of those brands that give you a lot more quality than you may ever need.

But if you're like most of us, you'd really rather just find a quad receiver that offers good quality and a good price. A quad receiver like one of those Sylvania receivers shown above. Their most important specs are shown below. Why not try one on your budget for size?
